

## BRITISH BASEBALL FEDERATION ANTI-DOPING POLICY

### British Baseball Federation Anti-Doping Policy

The British Baseball Federation (BBF) as the National Governing Body of the sport of baseball, have agreed to work in partnership with UK Anti-Doping (UKAD) to ensure that the integrity of our sport (baseball) is protected.

The use of performance-enhancing drugs and other doping behaviour severely damages the legitimacy of sport and undermines the integrity of clean athletes.

The British Baseball Federation has agreed to implement a set of anti-doping rules that all athletes, coaches and athlete support personnel must abide by as part of our Federation. The anti-doping rules for the BBF are consistent with the World Anti-Doping Code (2015 Code), which governs anti-doping internationally.

You can find the UK Anti-Doping Rules here: <https://www.ukad.org.uk/anti-doping-rules>

The anti-doping rules of the BBF are the UK Anti-Doping Rules published by UK Anti-Doping, as amended from time to time. Such rules shall take effect immediately and be construed as part of the rules of the BBF.

If you are a member of British Baseball Federation then the anti-doping rules apply to you, regardless of what level you participate at i.e., leagues (youth and seniors) and National Team Programme. The aims of the 2015 Code are to:

- Protect the Athletes' fundamental right to participate in doping-free sport and thus promote health, fairness and equality for Athletes worldwide, and
- Ensure harmonised, coordinated and effective anti-doping programmes at the international and national level with regard to detection, deterrence and prevention of doping

In the UK, the BBF works in partnership with UK Anti-Doping (UKAD) to prevent doping.

UKAD is the national anti-doping agency for the UK, dedicated to protecting a culture of clean sport – it achieves this through implementing education and testing programmes, gathering and developing intelligence, and prosecuting those found to have committed an Anti-Doping Rule Violation.

UKAD is responsible for ensuring sports bodies in the UK are compliant with the World Anti-Doping Code through the implementation and management of the UK's National Anti-Doping Policy.

### **What is Strict Liability**

All athletes need to be aware of the principle of strict liability. This means that all athletes are solely responsible for any banned substance they use, attempt to use, or that is found in their system, regardless of how it got there and whether or not they had an intention to cheat.

It is crucial that athletes check all medications are safe to take prior to use. Medications can be checked online via Global DRO.

Athletes must undertake thorough internet research of any supplement products before use – including the name of the product and the ingredients/substances listed. Information revealed as a result should be further investigated and we advise athletes to keep evidence of their search.

### **What are the Anti-Doping Rule Violations (ADRVs)?**

The 2015 Code outlines ten Anti-Doping Rule Violations (ADRVs). Athletes, and Athlete Support Personnel (ASP), may receive a ban from sport if any of the following ADRV's are committed:

- 1.1 Returning a positive test
- 1.2 Using, or attempting to use, a banned substance or method
- 1.3 Refusal or failure to provide a sample when requested
- 1.4 Tampering, or attempting to tamper, with any part of the testing process
- 1.5 Possession of a banned substance or method
- 1.6 Trafficking, or attempted trafficking, of any banned substance or method
- 1.7 Administering, or attempted administering, of a banned substance or method to an athlete; or encouragement, aiding and/or covering up of any involvement in an ADRV
- 1.8 Receiving any combination of three filing failures and/or missed tests in a time period of 12 months (for athletes who are part of the National Registered Testing Pool)
- 1.9 Complicity (new from 1 Jan 2015)
- 1.10 Prohibited Association (new from 1 Jan 2015)

All ten ADRV's apply to athletes. Only the ADRV's in bold apply to ASP.

### **Consequences are Significant**

Under the 2015 Code, a minimum four-year ban from sport will apply to those who are found to be deliberately cheating and breaking the rules.

The 2015 Code has little sympathy for carelessness – for inadvertent doping, athletes are more likely to face a two-year ban from sport.

All athletes, coaches and athlete support personnel need to make sure they have sufficient anti-doping knowledge to avoid committing an ADRV and receiving a ban from sport.

### **Managing Inadvertent Doping Risks - The Prohibited List**

All banned substances and methods in Code-compliant sports are outlined in the Prohibited List, which is updated at the beginning of every calendar year, but may also be updated throughout the year. The latest Prohibited List can be found on the WADA website [[wada-ama.org](http://wada-ama.org)]

### **Understanding the Importance of Checking Medications**

Before taking any medication (whether from a doctor or bought over the counter) athletes must check to make sure it does not contain any banned substances. Medications can be checked online at Global DRO [[www.globaldro.co.uk](http://www.globaldro.co.uk)]. It is important to note that medications bought in one country may contain different ingredients to the same branded medication in another country.

## Know the Risks with Nutritional Supplements

All athletes are advised to:

1. assess the need to use supplements by seeking advice from a medical professional or nutritionist on their need to use supplement products
2. assess the risks associated with supplements and undertake thorough research of all supplement products they are considering taking
3. assess the consequences to their careers – they could receive a four-year ban
4. before making a decision to use supplements.

However, supplement risks can be reduced by:

5. undertaking thorough internet research
6. only using batch-tested products
7. checking on Informed-Sport (which is a risk minimisation programme) that the supplement has been batch tested

Visit the UKAD website for further information [[www.ukad.org.uk/athletes/checking-medications-and-substances](http://www.ukad.org.uk/athletes/checking-medications-and-substances)] including information on the Informed Sport [www.informed-sport.com](http://www.informed-sport.com)] programme, which provides a batch-testing service for supplement products.

## Apply for a Therapeutic Use Exemption (TUE)

Athletes can obtain approval to use a prescribed banned substance or method for the treatment of a legitimate medical condition by applying for a TUE. For example,

- International-level athletes (as defined by their International Federation) need to apply to their International Federation for a TUE
- Athletes competing at National level need to apply to UKAD for a TUE

TUEs approved by UKAD, unless stated otherwise, are valid at national level only. If an athlete is competing at international events, a UKAD TUE will not be valid unless it is first recognized by the relevant International Federation or Major Event Organisation. Athletes should notify the relevant body of this as soon as possible prior to competing.

Athletes listed under the 'National' category for their sport must apply for their TUE in advance. The 'National' category for TUEs is defined by UKAD by sport and can be found on UKAD's website [here](http://www.ukad.org.uk/violations/tues) [[www.ukad.org.uk/violations/tues](http://www.ukad.org.uk/violations/tues)]. Only in an emergency situation or where there will be a severe impact on health should treatment begin without the necessary approval. Athletes not listed in the 'National' category would only need to apply for a TUE retroactively should they be tested and their sample return an Adverse Analytical Finding (AAF).

You can find out more about whether you need a TUE and how to apply for one (including emergency TUEs) on the UKAD website [here](#).

## Understand What Happens in a Test (Doping Control)

Athletes should feel prepared and know their rights and responsibilities when they are notified to be tested by a Chaperone or Doping Control Officer. When selected for testing, athletes should take a representative with them to the Doping Control Station.

A urine test will follow these main steps:

- Notification
- Reporting to Doping Control Station
- Providing a sample
- Recording and certifying sample information

## **UK Anti-Doping recommends that athletes follow their normal hydration routines if selected for testing.**

Athletes need to be prepared to provide details of any substances they have taken – this needs to be written on the Doping Control form. Athletes should report any concerns they have about the process or the equipment on the Doping Control form.

Athletes can find out more about testing, including their rights and responsibilities, in the Athlete Zone [www.ukad.org.uk/athletes/100-me](http://www.ukad.org.uk/athletes/100-me) or by downloading the Clean Sport App from their app store.

## **Know Where to Look for Support and Advice**

Please do not hesitate to ask questions about the anti-doping rules. As well as asking the British Baseball Federation, coaches and athlete support personnel, you may also contact UKAD directly, who will be able to answer any questions and provide guidance.

## **Help Keep the Sport of Baseball Clean**

We all have a responsibility to report doping in sport and help keep it clean. A 24-hour dedicated phone line, hosted by Crimestoppers, is ready to take your call if you have any suspicions or concerns about incidences of doping in sport. You can provide information in complete confidence by calling 08000 32 23 32 or via a secure website <http://secure.crimestoppers-uk.org/ukad/>. All information is passed securely to UKAD's intelligence unit for investigation.

## **Useful Links and Resources**

For essential anti-doping information download the Clean Sport App from iTunes, Google Play or Windows Live Store– the sport specific or the generic version.

## **Check Your Medications on Global DRO**

Remember to check all medications on [[www.globaldro.co.uk](http://www.globaldro.co.uk)] Global DRO, where you can search by ingredients or brand name.

## **Assess the Risk of Supplements on Informed Sport**

You can find information on supplements and ways of reducing the risks on Informed Sport. [[www.informed-sport.com](http://www.informed-sport.com)]

## **Register with the UK Anti-Doping**

Visit UKAD's website and register to keep up to date with the latest news. [[www.ukad.org.uk/account/register](http://www.ukad.org.uk/account/register)]

## **BBF Questions and Answers**

1. QUESTION: Who does the UKAD Anti-Doping rules apply?

ANSWER: The UKAD Anti-Doping rules are now the BBF Rules as well. All participants (volunteers, officials, National Team, Leagues, participants (youth and seniors) are required to know, observe and adhere to the rules.

2. QUESTION: Are youth and seniors league participants exempt?

ANSWER: No, all participants e.g., youth and seniors, must adhere to the UKAD rules.

3. QUESTION: Are you subject to a random drug test?

ANSWER: Yes, you are subject to a random drug test administered by UKAD. For youths, the mention applies, however, measures will be in place to ensure guardian/parental consent.

4. QUESTION: Can you opt out to adhere to the UKAD (BBF) Rules?

ANSWER: No. The UKAD rules are applicable and cannot be rescinded, unless you agree to be removed from the BBF e.g., leagues, events, etc.

5. QUESTION: Is there a cost for a random drug test?

ANSWER: No.
